#### **Megha Middha**

*Megha Middha, Assistant Professor of Law in Mody University of Science and Technology, Lakshmangarh, Sikar*

*Megha Middha, is working as an Assistant Professor of Law in Mody University of Science and Technology, Lakshmangarh, Sikar (Rajasthan). She has an experience in the teaching of almost 3 years. She has completed her graduation in BBA LL.B (H) from Amity University, Rajasthan (Gold Medalist) and did her post-graduation (LL.M in Business Laws) from NLSIU, Bengaluru. Currently, she is enrolled in a Ph.D. course in the Department of Law at Mohanlal Sukhadia University, Udaipur (Rajasthan). She wishes to excel in academics and research and contribute as much as she can to society. Through her interactions with the students, she tries to inculcate a sense of deep thinking power in her students and enlighten and guide them to the fact how they can*

*bring a change to the society*

#### **Dr. Samrat Datta**

*Dr. Samrat Datta Seedling School of Law and Governance, Jaipur National University, Jaipur. Dr. Samrat Datta is currently associated with Seedling School of Law and Governance, Jaipur National University, Jaipur. Dr. Datta has completed his graduation i.e., B.A.LL.B. from Law College Dehradun, Hemvati Nandan Bahuguna Garhwal University, Srinagar, Uttarakhand. He is an alumnus of KIIT University, Bhubaneswar where he pursued his post-graduation (LL.M.) in Criminal Law and subsequently completed his Ph.D. in Police Law and Information Technology from the Pacific Academy of Higher Education and Research University, Udaipur in 2020. His area of interest and research is Criminal and Police Law. Dr. Datta has a teaching experience of 7 years in various law schools across North India and has held administrative positions like Academic Coordinator, Centre Superintendent for Examinations, Deputy Controller of Examinations, Member of the Proctorial Board*

## Dr. Namita Jain

Head & Associate Professor

School of Law, JECRC University, Jaipur Ph.D. (Commercial Law) LL.M., UGC - NET Post Graduation Diploma in Taxation law and Practice, Bachelor of Commerce.

Teaching Experience: 12 years, AWARDS AND RECOGNITION of Dr. Namita Jain are - ICF Global Excellence Award 2020 in the category of educationalist by I Can Foundation, India. India Women Empowerment Award in the category of "Emerging Excellence in Academics by Prime Time & Utkrisht Bharat Foundation, New Delhi.(2020). Conferred in FL Book of Top 21 Record Holders in the category of education by Fashion Lifestyle Magazine, New Delhi. (2020). Certificate of Appreciation for organizing and managing the Professional Development Training Program on IPR in Collaboration with Trade Innovations Services, Jaipur on March

14th, 2019

## Mrs.S.Kalpana

Assistant professor of Law

Mrs.S.Kalpana, presently Assistant professor of Law, VellTech Rangarajan Dr. Sagunthala R & D Institute of Science and Technology, Avadi. Formerly Assistant professor of Law, Vels University in the year 2019 to 2020, Worked as Guest Faculty, Chennai Dr.Ambedkar Law College, Pudupakkam. Published one book. Published 8 Articles in various reputed Law Journals. Conducted 1 Moot court competition and participated in nearly 80 National and International seminars and webinars conducted on various subjects of Law. Did ML in Criminal Law and Criminal Justice Administration. 10 paper presentations in various National and International seminars. Attended more than 10 FDP programs. Ph.D. in Law pursuing.

## Avinash Kumar

Avinash Kumar has completed his Ph.D. in International Investment Law from the Dept. of Law & Governance, Central University of South Bihar. His research work is on "International Investment Agreement and State's right to regulate Foreign Investment." He qualified UGC-NET and has been selected for the prestigious ICSSR Doctoral Fellowship. He is an alumnus of the Faculty of Law, University of Delhi. Formerly he has been elected as Students Union President of Law Centre-1, University of Delhi. Moreover, he completed his LL.M. from the University of Delhi (2014-16), dissertation on "Cross-border Merger & Acquisition"; LL.B. from the University of Delhi (2011-14), and B.A. (Hons.) from Maharaja Agrasen College, University of Delhi. He has also obtained P.G. Diploma in IPR from the Indian Society of International Law, New Delhi. He has qualified UGC - NET examination and has been awarded ICSSR - Doctoral Fellowship. He has published six-plus articles and presented 9 plus papers in national and international

*seminars/conferences. He participated in several workshops on research methodology and teaching and learning.*

## **ABOUT US**

INTERNATIONAL JOURNAL FOR LEGAL RESEARCH & ANALYSIS  
ISSN

2582-6433 is an Online Journal is Monthly, Peer Review, Academic Journal, Published online, that seeks to provide an interactive platform for the publication of Short Articles, Long Articles, Book Review, Case Comments, Research Papers, Essay in the field of Law & Multidisciplinary issue. Our aim is to upgrade the level of interaction and discourse about contemporary issues of law. We are eager to become a highly cited academic publication, through quality contributions from students, academics, professionals from the industry, the bar and the bench. INTERNATIONAL JOURNAL FOR LEGAL RESEARCH & ANALYSIS ISSN 2582-6433 welcomes contributions from all legal branches, as long as the work is original, unpublished and is in consonance with the submission guidelines.

# **EVOLUTION AND GROWTH OF** **ASSISTIVE TECHNOLOGY FOR** **WELL BEING OF INDIVIDUALS** **WITH SPECIAL NEEDS**

*Authored By- Dr. S.M Abinaya*

## **ABSTRACT**

Assistive technology is an equipment or a device which enhances the living standard of people with special needs. The evolution and growth of technology had led to the formation of Assistive technology. There are different kinds of assistive technology such as Braille, Prosthetics, Screen Readers, Wheel Chair, Power Lifts etc., which are suitably created for different Levels and kinds of Disability. The Assistive technology has created a great impact in the life of people with special needs, thus by enhancing their life style and promoting independence. Several International, National and State Treaties, Conventions, Laws and Policy had made a revolutionary change towards the implementation of the Assistive Technology worldwide leading to the empowerment of the People with Special needs. This Research paper confers a detailed study on the Evolution, Importance and Impact of the Assistive Technology in the Life of People with Special Needs and the shortcomings faced by them in attaining and using the assistive technology. The Researcher had used Qualitative form of Methodology to enhance the readers insight into the findings of the true nature of the Assistive Technology in our todays Society.

**Keywords:** Assistive Technology, People with Special Needs, Technology, Empowerment, Disability, Life Style etc.

## INTRODUCTION

The term Assistive Technology in Medical Science signifies “an equipment which is designed to aid, help or assist a person with disability to perform his daily task, activity or work independently without the dependence or intervention of others in their day today life.”

There are various kinds of assistive technology formulated for different levels of disability. These Assistive technologies possess a tremendous importance and plays a predominant role in the life of the differently abled people by assisting them in hearing, learning, speaking, seeing, walking, reading, typing, remembering etc. Depending on the level and nature of the disability, the assistive technology equipment differs from one person to another. The most common examples of the assistive technology are as follows : Braille, Prosthetics, Screen readers, Wheel chair, Power lifts, Walkers, Hearing Aid, Spectacles, Special computers and keyboard, Screen magnifier etc. For the better understanding of the Assistive technology and its impact on the life of the people with special needs, one must clearly understand the true nature and objective behind the formulation of such technology.

The History of Assistive technology could be traced back to 950 BC and its potential development portrays us the advancement that was possessed by the humans who existed before the common era. The subsequent growth of the technology had intensified the advancement, development and improvement of various kinds of Assistive technology globally. Whereas the main aim and objective of the Assistive Technology is to enhance and uplift the life of people with disability.

As per the World Health Organisation “Around 15% of the world’s population or estimated 1 billion people live with disabilities. They are the World’s largest Minority”. Whereas 80% of People with disability are found in the Developing country. There are 4 main types of disability such as: Behavioural or Emotional disability, Sensory Impaired disability, Physical disability and Developmental Disability.

- **Behavioural or Emotional Disability** includes Anxiety disorders, Dissociative disorders, Disruptive or Impulsive behaviours, and Pervasive development disorders
- **Sensory Impaired Disability** includes Hearing impairment, Vision Impairment, Speech Impairment, Smell and Touch impairment.

- **Physical disability** includes Mobility impairment.
- **Developmental Disability** includes Attention deficit hyperactivity disorder (ADHD), Cerebral palsy, Autistic spectrum disorder (ASD), Intellectual disability, Learning disabilities.

Whereas only 10 in 100 disabled people have attained the privilege of enjoying the assistive technology however the remaining people are dependent on others for carrying out their day today basic needs. This research aims in addressing the Evolution, Growth, Impact, Awareness and Implementation of Assistive Technology in India for better understanding of the Disability and the improvement of the differently abled people's lifestyle through Assistive Technology.

## **EVOLUTION AND GROWTH OF ASSITIVE TECHNOLOGY IN INDIA**

The Term "Assistive Technology" is defined as "any item, piece of equipment, or product system, whether acquired commercially, modified, or customized, that is used to increase, maintain, or improve functional capabilities of individuals with disabilities" as per The Assistive Technology Act 2004 (United States).

The History of Assistive technology could be traced back to 1500 BC, where the Great Indian Legacy, Rig Veda contains 1<sup>st</sup> written record of prosthetic used by Queen Vishpla for replacing her lost limb in the war and it further dates back to 950 BC, where the oldest prosthetics, *the Cairo Toe* - an artificial toe was found by the scientist on a mummy in Egyptian tomb at Luxor. Further it is rigidly believed by the scientist that the time line of the formation and use of the Assistive Technology could even trace back to 300 BC.

Multiple discoveries have been made by several prominent scientist on the usage of Prosthetics during the early 16<sup>th</sup> Century. Whereas artificial limbs were one of the most popular Assistive technologies evolved to restore the lost limbs of the Kings during the war. Further the inclination of World War I and II, which resulted in amputation of the Limbs of several fighters, were restored by the usage of Prosthetics. Apart from Prosthetics, other assistive technology was also stated to be widely used across the common era such as Braille, Wheel Chairs, Walkers, Spectacles etc.

These pivotal discoveries and studies made by several scientist proves us that, the Assistive Technology is not an alien conceptualisation of the modern era development but it was an already existing technology which was used to elevate the lifestyle of the people living before and during the common era. Further the subsequent needs of such technology boosted its development and thereby acting us a module and making a great impact on our Modern Era. One of the few prominent examples of the Assistive Technology is the first Audiophone Bone Induction Amplifier which was invented in United States in the late 80s for enhancing the people with hearing disability.

Several Researchers, Scholars, Scientist and Engineers had played a prominent role in the development of the Assistive Technology in the 21<sup>st</sup> Century, which has been an remarkable era portraying significant improvement in the growth of the Assistive technology.

Advancement of Assistive Technology has drastically improved the quality and lifestyle of the differently abled people. The modernised version of the latest Assistive Technology are as follows – motorized wheelchair, ankle exoskeleton, contact lens, hearing aid, orthoses, screen readers, text to speech software, voice recognition programme, special keyboards, scooters etc.

The Scientist are positive that the immense growth of the Assistive Technology would amplify the conflicts faced by the differently abled people and would potentially turn their hostile environment into a vibrant contexture.

## **IMPACT OF ASSITIVE TECHNOLOGY ON THE PEOPLE WITH SPECIAL NEEDS**

The development of the Assistive Technology had bought an immense impact in the life of the Differently abled people. This system had exuberantly benefited the lives of the people with disability, senior citizens etc. This in toto had improved the quality of their life and had provided them freedom to independently act on their own means. Further their access to education and employment has been made possible due to the evolvment of the assistive technology.

As per the study conducted in the Journal “Disability and Rehabilitation” it was found out that

“The Assistive Technology can contribute to improving the quality of life of people with disabilities, by providing them with a safe and secure environment and enabling them to participate in activities that would otherwise be difficult or impossible.”

It is to be construed that the three important objectives of the Assistive Technology i.e, ***Independence, Mobility and Communication*** has been attained by the usage and support of the Assistive Technology. Whereas all these three objectives are the core stones which enables a person to live a fulfilled life without any burden.

The Assistive Technology not only empowers people with special needs to live an independent life but also it helps them to live their life more dignified. The other outsources of the Assistive Technology are that it helps the differently abled people to regulate their health. As a matter of fact, all these leads towards an increased life expectancy of the people.

## **AWARNNESS AND IMPLEMENTATION OF ASSISTIVE TECHNOLOGY FOR PEOPLE WITH SPECIAL NEEDS**

**“The best way to attain right and liberty is through knowledge, awareness and implementation !”**

The differently abled people will be able to attain their rights only when they are bestowed with the knowledge and awareness about their rights and liberty in the first place. It is predominant to mention that the Awareness, State Funds and Implementation are the core principle which can lead to the effective formulation and use of the Assistive Technology by the people with special needs.

Whereas according to the United States Research report, it has been established that, “1 billion people globally live with disabilities, and as many as 70 million of them live in India. In India, individuals with disabilities face barriers to success from non-existent or inaccessible infrastructure, as well as prejudicial beliefs and discriminatory laws.” Whereas the most vulnerable groups among the differently abled people are the Women and Children who face

multitude difficulties in leading a normal life. Further it has been established from time to time through the enforcement agency that, the crime rates have been increasingly committed against these vulnerable sectors of the disabled society.

The main core body that is responsible for elevating the rights of the differently abled peoples are the *National Institute For Persons With Multiple Disability*. Whereas, the conceptualisation and enforcement of the Assistive Technology falls under the umbrella domain of the *Ministry Of Social Justice Department Of India*.

One of the Special laws that explicitly governs the rights of the differently abled persons is "*The Rights of Persons With Disabilities Act 2016*". Whereas *Section 40, 41 and 42* of the aforementioned Act conceptualizes the Accessibility towards the Differently abled people. As per the above-mentioned provisions, it shall be the absolute duty and responsibility of the State Government to propagate necessary arrangements for implementing the Assistive Technology cum Assistance to the differently abled persons.

Several initiatives have been taken by the Governments to achieve effective propaganda an implementation of the same. As to the effect of which the Government had formed a Scheme named "*Assistance to Disabled Persons Scheme*" to rehabilitate the life of the differently abled people by providing them funding facilities needed to purchase the Assistive Technology. Further several Campaign for Accessible India has been conducted around various sites near Tamil Nadu for creating awareness among the Differently abled people.

It is unfortunate as well as shocking to state that 80% of the differently abled people are not able to obtain a Assistive Technology due to insufficient implementation, funding and lack of awareness & knowledge. Due to this very fact the Differently abled people are unable to tangibly enforce their rights inspite of the existence of the Law.
